

Medialess Microsoft Visio Standard 2019 Product Key For Windows 10 1 PC

Our Product Introduction

for more products please visit us on computersoftware-systems.com

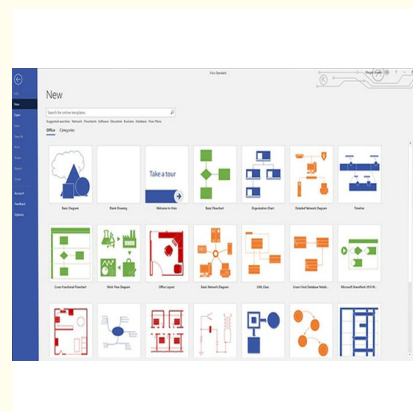

Basic Information

- Place of Origin: USA
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: visio Standard 2019
- Minimum Order Quantity: 10pcs
- Price: Negotiable
- Packaging Details: Factory Sealed Retail box / OEM
- Delivery Time: 3-7 work days
- Payment Terms: T/T, Western Union, MoneyGram, Paypal, Skrill
- Supply Ability: 5000pcs/week

Product Specification

- PLATFORM SUPPORTED: Desktop / Laptop
- Sticker Only: Support
- LICENSED USE: Licensed For Home And Commercial Use
- DEVICES SUPPORTED: 1 Device
- Activation Type: Online
- System Type: Windows
- Processor: 1.6 Gigahertz (GHz)
- License Qty: 4.0 GB
- Highlight: 1 PCs Microsoft Visio Standard 2019, Medialess Microsoft Visio Standard 2019, Windows 10 microsoft visio 2019 standard

Product Description

Medialess Microsoft Visio Standard 2019 Product key for Windows 10 1 PC

Product details

Visio Standard 2019 gives you the ability to create professional and engaging diagrams with a variety of new and updated shapes, stencils, themes and effects. You can now easily change shapes in existing diagrams without losing your layout and shape connections - making it simple to change the look of your diagram without losing any of the work you've already done.

Microsoft Corporation

Create professional diagrams easily with ready-made templates and shapes

Get started quickly with a familiar Office-like experience

Use your finger or pen to draw and take notes naturally on touch-enabled devices

Create database visualizations using built-in database model diagrams

Collaborate with others by adding and replying to comments directly within Visio

WHAT'S NEW IN VISIO 2019?

Kick-start your diagrams

The Organization Chart, Brainstorming, and SDL templates have new starter diagrams to get you up and running quickly.

Built-in database model diagrams

The new Database Model Diagram template accurately models your database as a Visio diagram. No add-in required.

Create wireframe diagrams for websites

Bring ideas to life by using a Visio wireframe. A wireframe is a detailed visual model of an interface that is like a blueprint of functionality and content. These new Website Templates are ideal for creating a low-fidelity, design sketch to present ideas, arriving at a team consensus, and forming the basis of a high-fidelity wireframe.

New UML component diagrams

You can create UML component diagrams that show components, ports, interfaces and the relationships between them.

New UML communication diagrams

You can create UML communication diagrams that show the interactions between lifelines that use sequenced messages in a free-form arrangement.

New UML deployment diagrams

You can create UML deployment diagrams that show the architecture of a deployment of software artifacts to nodes.

Enhanced AutoCAD support

Before, Visio supported .dwg and .dxf files from AutoCAD 2007. With this update, you can import or open files that are from AutoCAD versions 2017 or prior.

Improved AutoCAD scaling

With this update, you will see scaling improvements when importing AutoCAD files. Just make sure to set a couple of properties first. In AutoCAD, make sure that the active tab is a layout tab, and not the model tab. Also, make sure that the Visio drawing scale is set to the same scale as the AutoCAD viewport scale.

Faster import of AutoCAD files

With this update, you will notice that AutoCAD import speed is greatly improved.

Instantaneous shape overlay

There used to be long delays when working with shapes on top of CAD files. With this update, there's no delay.

Features:

VERSATILE TEMPLATES AND THOUSANDS OF SHAPES

Choose from dozens of templates, including built-in wireframes and thousands of customizable shapes to transform numbers, ideas and other data points into coherent and impactful stories.

SIMPLE, SECURE SHARING

Share your diagrams from secure online repositories, like OneDrive for Business and SharePoint (sold separately).

IN-APP COMMENTING

Associate comments with specific shapes for clearer stakeholder feedback.

DATA-DRIVEN DIAGRAMMING

Automatically generate org charts from data sources like Excel, Exchange or Azure Active Directory.

AUTOCAD SUPPORT

Ability to import DWG files, including enhanced file format support.

FLEXIBLE EDITING

Easily change shapes in existing diagrams without losing your layout and shape connections, making it simple to change the look of your diagram without losing any of the work you've already done.

Requirements

Processor	1.6 gigahertz (GHz) or faster, 2-core
Operating system	Windows 11, Windows 10, Windows Server 2019
Memory	4 GB (64bit), 2 GB (32bit) RAM
Hard disk space	4 GB available disk space
Display	1280 x 768 screen resolution
Graphics	DirectX 10 graphics card for graphics hardware acceleration
