Classic 2019 versions of Word, Excel, and PowerPoint

Microsoft support included for 60 days at no extra cost

Licensed for home use

Meet Office Home & Student 2021

Updated classic apps for a better experience

Create with confidence

Keep working anywhere because your apps are fully installed on your PC or Mac, so you're not tied to the internet to get things done.

Work together seamlessly

Work with others in the same document at the same time with innovative collaboration tools.

Track & organize effortlessly

Enjoy easier tracking and organization with new tool and updated features in Office Home & Student 2021.

How Does Office 2019 Compare to Office 2016?

Office 2019 does offer some of the new features incorporated into Office 365 since the release of Office 2016. This includes features like the following:

Improved inking in all the Office apps

A PowerPoint Morph transition that lets you create the appearance of movement between similar slides

Some new chart types in Excel

A Focus Mode in Word that hides onscreen window elements to help minimize distraction.

A Focused Inbox in Outlook that keeps your important messages separate from all the less important ones

Some better integration with the newer Microsoft servers and services (like Teams)

There are some more features we didn't list, but it's not much, honestly. Businesses might be interested in upgrading, especially if they're using some of those services and need better integration. But for home and small business users, there's nothing that compelling there. If you've already got Office 2016 and it's working well for you, there's not much reason to upgrade.

Office 2019 Word

Easier on the eyes across Word, Excel, Powerpoint, Outlook, OneNote with Office 2019 Word Black Theme.

Office 2019 Word offers additional learning features and tools, captions, audio descriptions, text to speech and more accessibility improvements

Office PowerPoint 2019

Office PowerPoint 2019 fuels a richer and more dynamic presentation experience, including the effortless creation of cinematic motion, applying the motion of 3D objects into your slides, while being able to jump between sections in the order you decide with the simple stroke of a pen.

Office 2019 Excel

Office 2019 Excel enriches your presentations with better scaling, new chart types and more elements designed to identify insights, trends and opportunities to leverage your data. Plus, using the visual chart type, TimeLine you can show a series of events in chronological order over a linear progression of time.

Requirements

PC	Mac
Microsoft account	Microsoft account
Internet access	Internet access
Windows 10	Intel processor
1.6 GHz, 2-core processor	4 GB RAM
4 GB, 2 GB (32bit) RAM	10 GB available disk space
4 GB available disk space	Mac OS Extended or APFS
1280 x 768 screen resolution	1280 x 800 screen resolution

Operating System: Office 2019 for Mac requires macOS Sierra, macOS High Sierra, or later, Windows 10, Windows Server 2019

Is internet access required for office 2019?

Unless you are installing from physical media, internet access is required to download and activate Office 2019.

You don't need to be connected to the internet to use the Office applications, such as Word, Excel, and PowerPoint, because the applications are fully installed on your computer.

What is a Microsoft account and why do i need if for office 2019?

A Microsoft account is an email address and password that you use with Outlook.com, Hotmail, Office, OneDrive, Skype, Xbox, and Windows. As part of purchasing Office, you'll be prompted to sign in with your Microsoft account. After redeeming your purchase at setup.office.com, your Office product is added to your Microsoft account and you'll use this account to install or reinstall Office.
